Farewell Meeting.

The Twentieth Century Club held one of its most enjoyable meetings last Wednesday afternoon with Mrs. Norman E. Rendall, this being the last meeting of the season.

The first souvenir, a handkerchief bag made of fancy handkerchiefs, was won by Mrs. Lamar Gill of Raymondville, who was the guest of the club. The second souvenir was a dainty powder puff, which was awarded to Mrs. Benjamin Kowalski.

Ice cream and cake were served after the game.

This closed a season which the club has found exceedingly pleasant. The game of Five Hundred, which was first tried this season, has proven very interesting and the members have become quite expert players.

A Year Without a Summer.

During the extraordinary year of 1816 January and February were warm and spring-like. March was cold and stormy. Vegetables had gotten well on in April, when real winter set in. Sleet and snow fell on seventeen different days in May. In June there was either frost or snow every night but three. The snow was five inches deep for several days in succession in the interior of New York, and from ten inches to three feet in Vermont and Maine. July was cold and frosty; ice formed as thick as window panes.

August was still worse, ice formed nearly an inch in thickness and killed nearly every green thing in the United States and in Europe. In the spring of 1817 corn which had been kept over from the crop of 1815 sold for from five to ten dollars a bushel, the buyers purchasing for seed. On May 10, 1885, snow fell to the depth of a foot in Jamestown and was piled up in huge drifts in the northern states.—St. Mary's (Md.) Beacon.
